ABOUT ME

I am currently a sixth-semester student enrolled in the Multimedia and Network Engineering program at the State Polytechnic of Ujung Pandang. My primary expertise encompasses graphic design, full-stack website development, and mobile app development. Additionally, I possess proficiency in videography and photograph

Throughout my academic journey, I have engaged in diverse projects encompassing creative graphic design, web development, and machine learning programming. I have acquired and mastered various programming languages and web development tools essential for crafting visually appealing and responsive websites. Moreover, I have hands-on experience with mobile application development tools and methodologies.

Whether working independently or as part of a collaborative team, I excel in managing tasks effectively, ensuring optimal outcomes for each project. My versatile skill set enables me to make significant contributions to diverse projects and consistently achieve exceptional results.

EDUCATION

Politeknik Negeri Ujung Pandang

EXPERIENCE

OmuraDrink Powder Official - UI/UX Web Design

Digitalent Bootcamp project

January 2022 - February 2022

- Designed the UI/UX for the official website of OmuraDrink Powder, utilizing Figma and Adobe XD software. Crafted intuitive and visually engaging designs to enhance the user experience of the beverage powder product's website.

School Website Project with a Database and Responsiveness

Individual Campus Project

April - June 2023

- Creating an Initial Design for the Website Project using Adobe XD and Figma Software to depict the UI layout and concept of the website.
- Converting and implementing the website's UI design into programming code using HTML, CSS, and JavaScript in Visual Studio Code application.
- Using the CodeIgniter framework and designing the website's database using PHP and MySQL programming languages.

Appilajara 3D - Educational 3D Game Project using Unity

Individual Campus Project

June 2023 - July 2023

- Crafted captivating characters and environmental objects for Appilajara 3D using Blender, enhancing visual appeal and immersion.
- Developed engaging gameplay mechanics and features using C# in Visual Studio Code, ensuring an immersive gaming experience.
- Created a versatile game application playable on both mobile and desktop platforms, providing flexibility and accessibility to users.

Beautiful calculator website with light and dark mode

Individual Bootcamp Project

January 2024

- Developed a versatile calculator program using HTML, CSS, and JavaScript, equipped with various number counting operations to cater to diverse user needs.
- Designed an aesthetically pleasing website interface featuring both light and dark modes, offering users the flexibility to choose their preferred visual theme for optimal viewing comfort.
- Deployed the calculator website on GitHub, making it publicly accessible and allowing users to utilize the calculator tool conveniently.

Sparta's vocabulary diary website - Full-stack Web Development

Individual Personal Project

April - May 2024

- Developed a simple vocabulary diary website, utilizing Flask Framework to create an interactive platform. Users can easily input and manage their vocabulary entries, with the site seamlessly fetching data from Merriam Dictionary Official website.
- Utilized MongoDB as a robust data storage center, ensuring efficient management of vocabulary entries and enhancing the scalability of the website.
- Deploying the website using the Glitch platform, enabling public access to the vocabulary diary website free of charge.

CAT's Petshop and Clinic - Full-stack Web Development

LearningX Project

June 2024 - July 2023

- Designed and developed an interactive website for CAT's Petshop and Clinic, focusing on user-friendly design and comprehensive functionality.
- Using the Flask Framework to build the entire website, ensuring seamless integration between the pet supply store and the animal health clinic.
- Integrating MongoDB as a database management solution, ensuring site responsiveness and scalability in the face of significant user growth.
